a4a ADHD Access for All

The long-term clinical, societal, economic, and political impact of Attention-Deficit/Hyperactivity Disorder (ADHD)

Researchers from The University of Hong Kong and international collaborators are seeking individuals with ADHD or their caregivers to complete a questionnaire!

By completing a **20-30 minute** questionnaire, you can support the HKU research team and international researchers to:

Assess the global socio-economic burden of ADHD on individuals and caregivers

Strengthen support and outcomes for individuals and caregivers

Provide a valuable basis to inform future healthcare and service planning locally and internationally

EUR €5 e-voucher
for the first 200 participants!

Who can take part?

1. Adults with ADHD, self-complete
2. Adult family caregivers, completing on behalf of their child or adolescent with ADHD
